Kindergarten Teachers Needed

for a Research Study on

MyMath Academy

Designed for Our Youngest Learners

My Math Academy offers a game-based learning approach that provides interactivity, adaptive challenges, and ongoing feedback to sustain engagement and motivation. Interactive, flexible formative assessments place students in the program quickly, leaving more time for learning. Continuous embedded assessments are designed to keep students in their Zone of Proximal Development, with just the right amount of productive struggle to maximize learning.

What does the research study involve?

Participating kindergarten teachers will be asked to

- Attend a virtual kickoff call.
- Complete online trainings prior to beginning classroom implementation.
- Facilitate student usage of My Math Academy for at least 45 minutes per week during the spring 2023 semester.
- Use the Teacher Portal and available resources to maximize the benefits of My Math Academy.
- Complete pre- and post-surveys and 1–2 teacher logs.
- Coordinate one-to-one math assessments during the spring semester.
- Coordinate classroom observations during the middle of the spring semester.
- Participate in an end-of-study interview.

Participating districts/schools will be asked to

- Provide de-identified demographic and assessment data.

Are there benefits for participants?

- Teachers can receive up to $300 for completing all research study activities.
- Compensation will be in gift cards.
- Terms and conditions apply.
